## 'SCA & The Norris Museum'

MAY 2019

Our Year 11 pupils have been working with The Norris Museum and St Ives in Bloom to learn all about herbs and their usage. They have helped to grow seeds and potted plants, which have been used as medicines for many years. They have also been learning about how herbs are used in clothes, food and perfumes. Students then cleared and planted a new flower bed with medicinal plants (you can see them from the seated area by The Waits, next to The Norris Museum)

On 23rd May, the new 'Physic Garden' was officially opened by Susan from the museum and Deputy Mayor Jonathan Pallant. The celebrations continued inside the museum with home-made lavender scones and fresh lemonade for students to enjoy.

What a brilliant project - thank you and well done to all involved!
