

Alconbury Weald Education Campus – Exhibition Event

Horizons Education Trust is delighted to be involved in the development of a brand new special school co-located to a new secondary school for DEMAT, as part of the Alconbury Weald Education Campus. Once opened, the special school will be known as Prestley Wood Academy.

The Trust and I have worked closely with the design and project team to develop a building and landscape design that will help us deliver an exemplary level of service delivery for many years to come, for special needs children and young people age 3 to 19.

The dedicated design team have been working on this project for a number of years and the final design builds upon the best practice for design principals for special schools and that of Spring Common Academy in Huntingdon. The Morgan Sindall Construction and the project team recognise the importance and value of consulting with the local community and we would welcome your views on the emerging proposals as part of the education campus at Alconbury Weald.

**A public event has been arranged on
Tuesday 14 September 3.30 – 6.30 at The Club Building, Alconbury Weald**

Information is hosted on Morgan Sindall Construction's website and information updates will be added to Horizons Education Trust and schools websites: www.horizons.org.uk

Subject to a satisfactory planning process, construction work with Prestley Wood Academy will commence with target for completion by September 2023.

The Trust are very excited about this project and the real benefits it can bring the pupils and their families in Cambridgeshire and look forward to receiving constructive feedback.
