

Put a + or - in each circle to make the number sentence right.

$$17 \quad \bigcirc \quad 3 \quad \bigcirc \quad 2 = 12$$

$$56 \quad \bigcirc \quad 7 \quad \bigcirc \quad 3 = 52$$

$$90 \quad \bigcirc \quad 5 \quad \bigcirc \quad 1 = 94$$

Now have a go at making 3 of your own for someone to try and solve.
