

Number activities with lego!

Counting – build a tower of a certain number of blocks, count them to make sure you got the correct number and then knock it down!

Try this for:

5

7

10

15

1 more – build the towers again and then add 1 more block and see how many there are now!

1 less – Build the towers again and take 1 block away and see how many are left now!

Adding – Make 2 towers and add all of the blocks together to see how many there are altogether.

Subtracting – Count a group of blocks, take 1 away and then see how many are left.

Counting in 2s – Make small towers of 2 blocks each and count in 2s (2,4,6.....)

Counting in 5s – Make towers of 5 blocks each and count in 5s (5,10.....)
